CUSTOMER SUMMIT 2024

Workbooks

Part 1:

-Sales and marketing alignment

-Funnel best practice

-Measurement

Part 2: Demonstration

-How Snapshot reporting works

-Examples of Opportunity Pipeline and Sales Conversion reports

Sales & Marketing alignment – why does it matter?

It provides measurable and significant benefits:

- 24% faster three-year revenue growth
- 27% faster three-year profit growth

But it's difficult!

Only 8% of companies have strong alignment
between their sales and marketing departments

FORRESTER®

Successful Sales & Marketing

Defining the Sales & Marketing Process

A common process which covers:

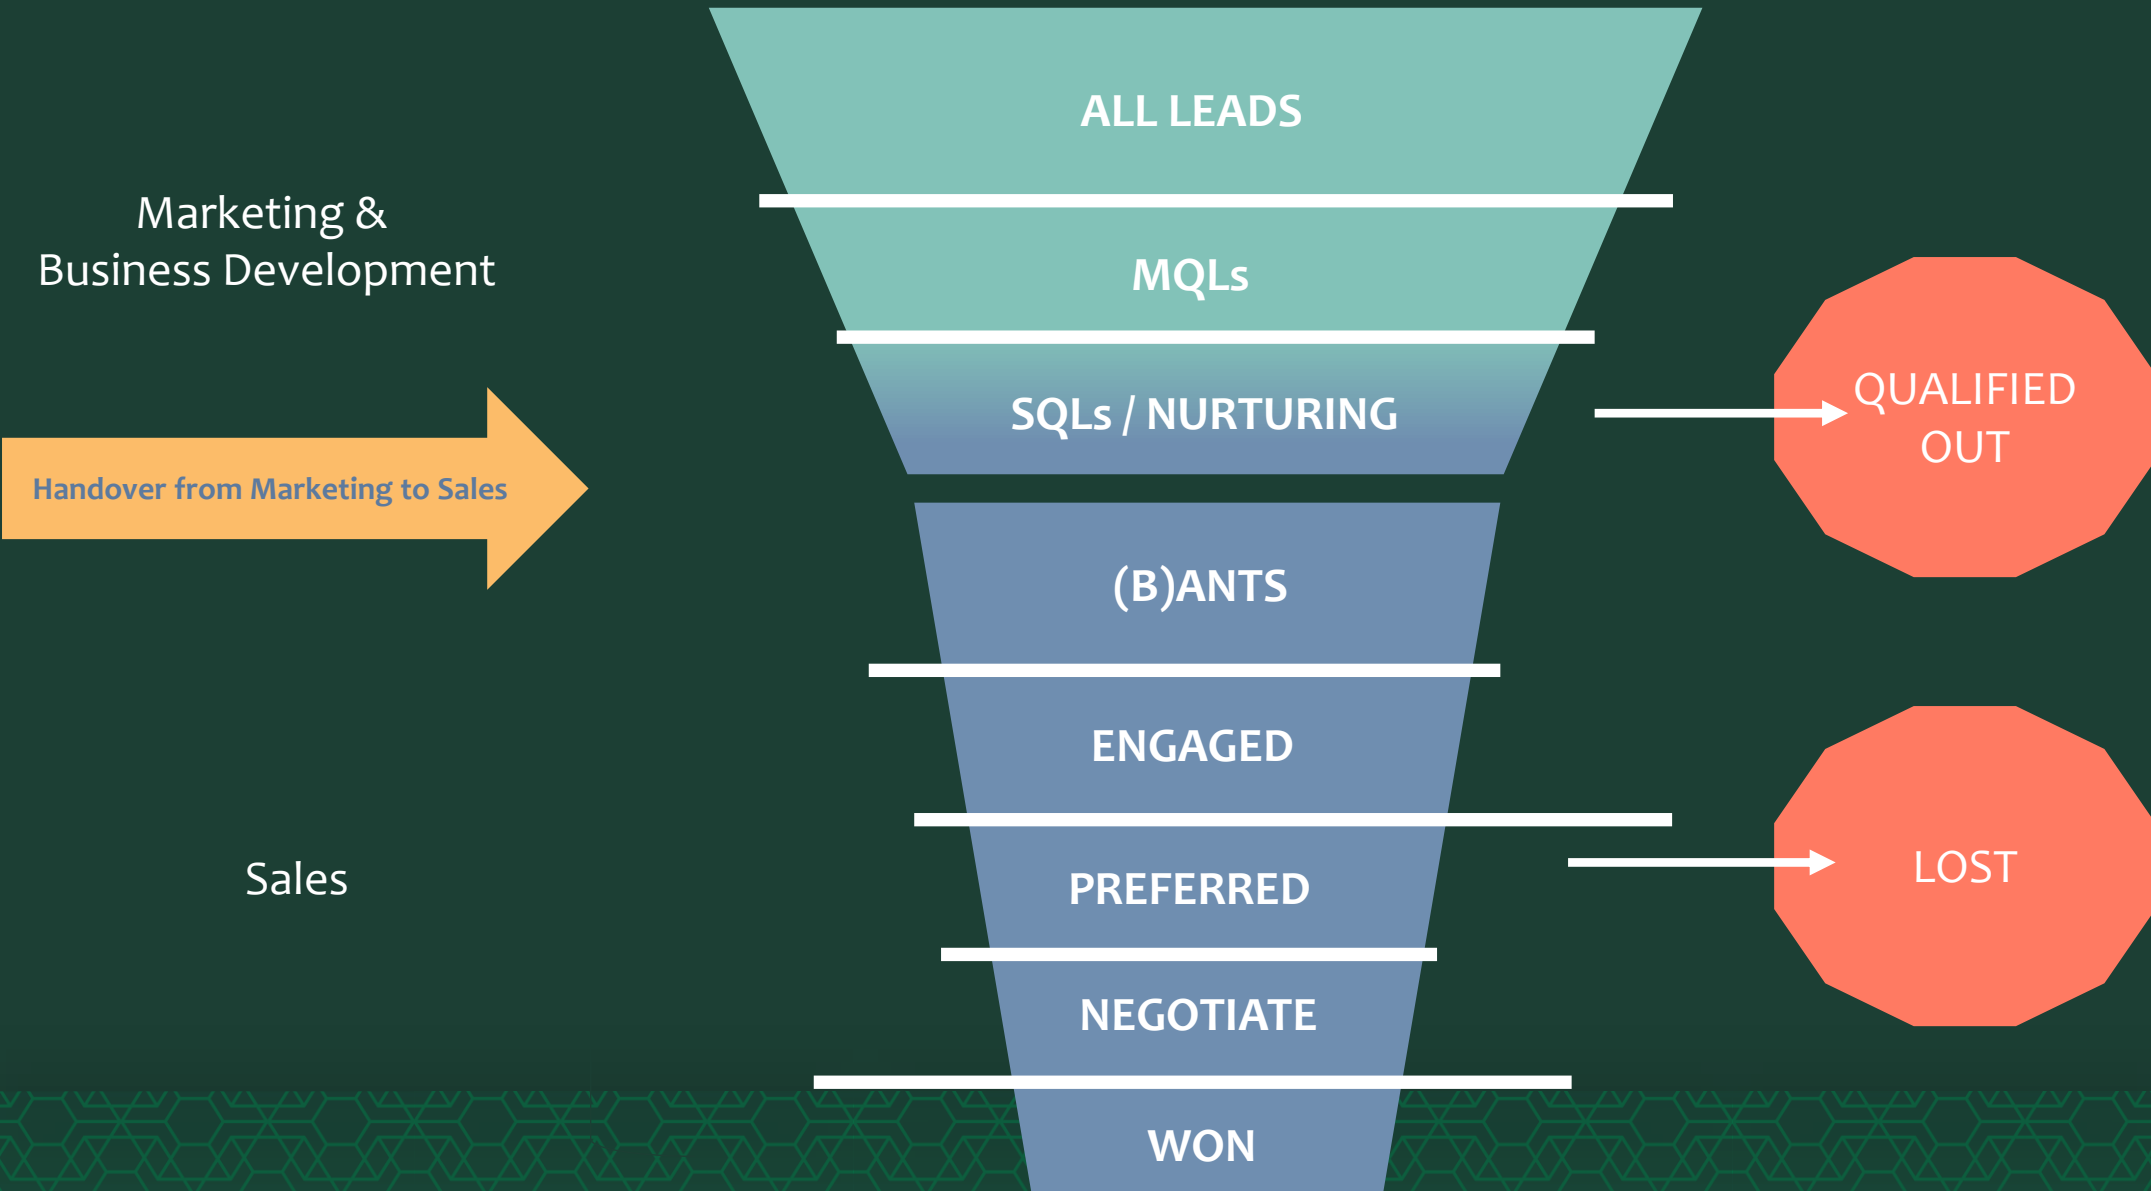

- Marketing & Sales
- Lead generation to closed/won

It needs to clearly define:

- Stages and ownership at each stage
- Handover points and Service Level Agreements (SLAs)
- Targets and KPIs

Example: Workbooks Sales & Marketing Funnel

Understanding the Metrics

Use Cases

1. Data Flattening

- Bringing data from multiple records into one place
- Quicker and easier reporting

2. Trend Analysis

- Analysing how data changes over time

What are Report Snapshots?

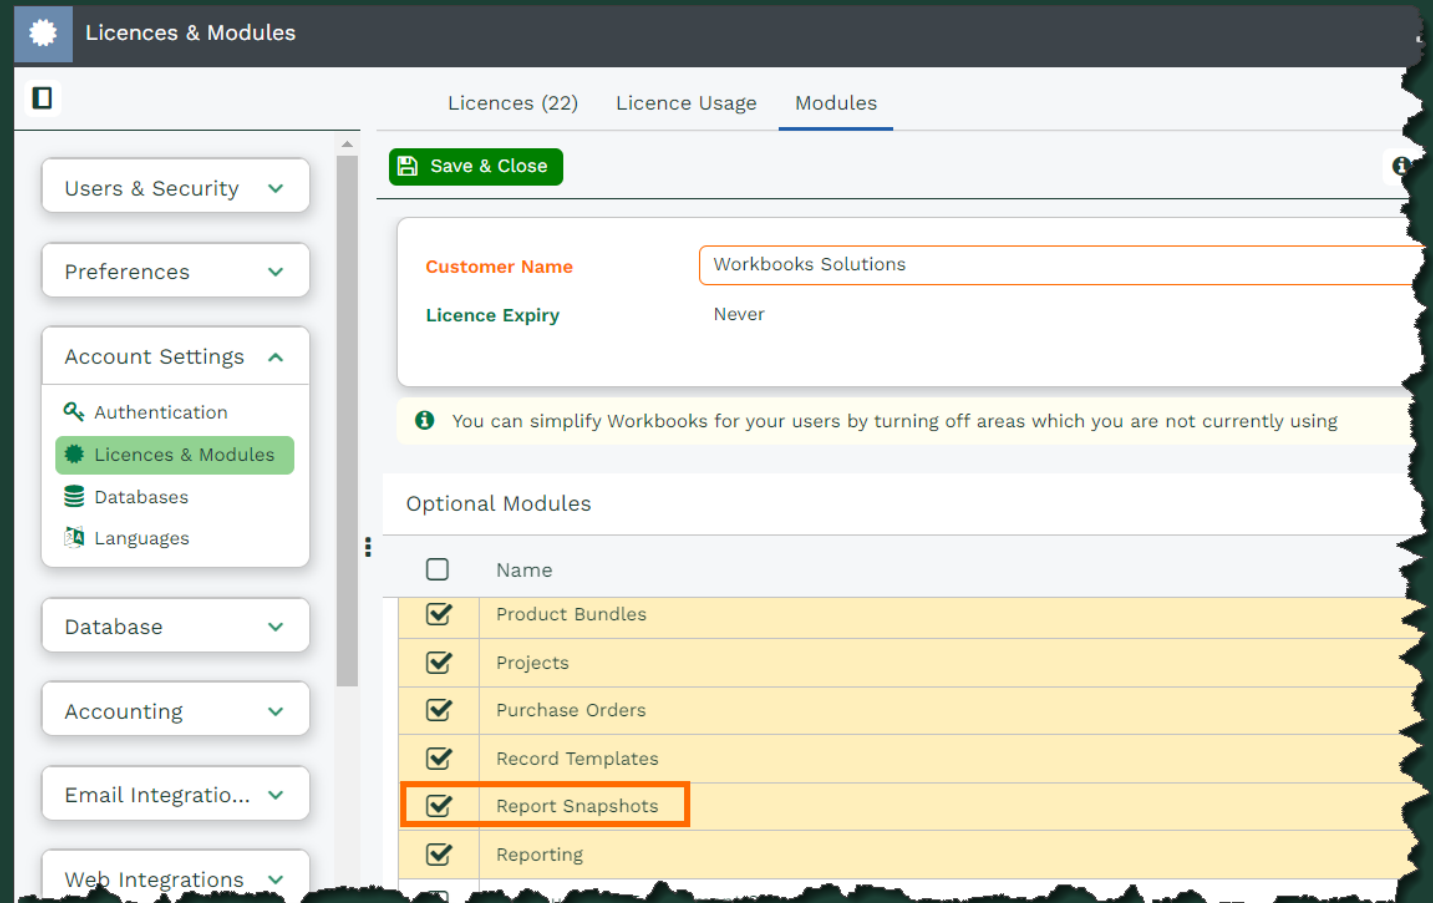

1. Allow you to join multiple pieces to data together to make reporting easier – **data flattening**
2. A way to report on historical data, eg
 - What was the value of my Opportunity Pipeline this time last year?
 - How many open Support Cases did we have at the end of last month?
 - How many people were registered to attend my Event last week compared with how many are registered now?

How do Report Snapshots work?

- Think of Report Snapshots as taking images of the data in a Report(s).
- These images are stored on a custom record type.
- Columns in the Report are created as fields on a custom record.
- A record is created for each row in the Report.
- Take Snapshots on a schedule - daily, weekly or monthly.
- You can decide how long you retain that data.

Can everyone create Report Snapshots?

- MUST have Custom Records (included in Pro Editions or available as an extension)
- Ensure 'Report Snapshots' Module is enabled.

You will need:

1. A 'source' report/reports
2. A target object (custom object that stores data from 1 above)
 - a) Each report column can = field on the target object
3. A Snapshot schedule
 - a) Daily
 - b) Weekly
 - c) Monthly
4. An 'output' report/reports, based on the data captured above.

Opportunity Results Week 3

Name Anderson Handling - VoIP & Support	Type New business
OPP Id 115	

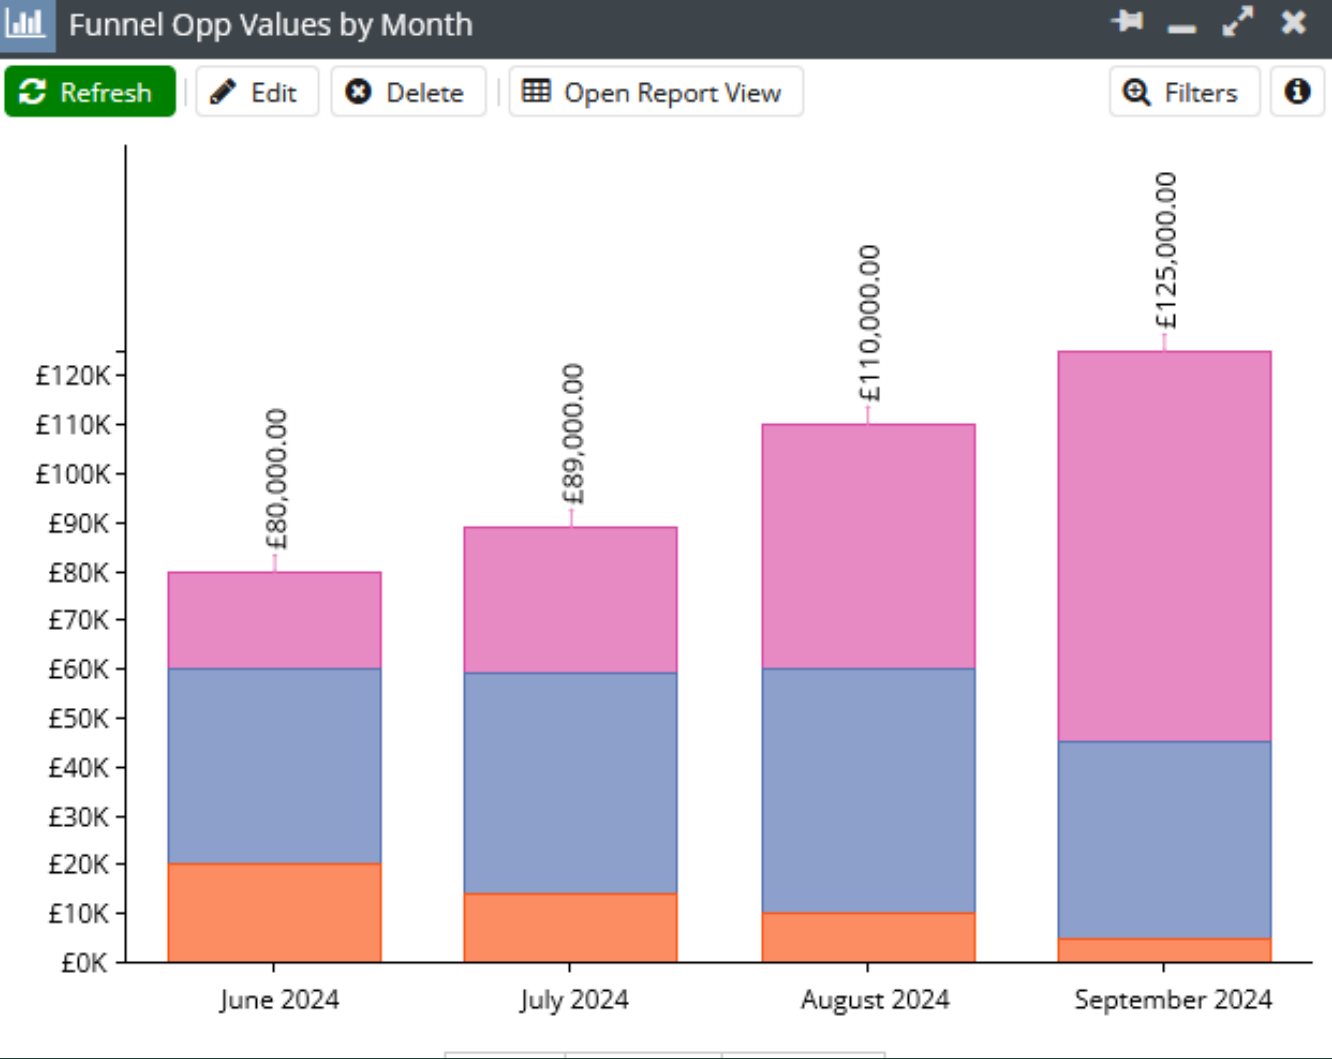

Example Output – Number of Opps by Sales Stage Over Time

- Opportunity Sales Stage 1
- Opportunity Sales Stage 2
- Opportunity Sales Stage 3

Example Output – Value of Opps by Salesperson Over Time

- Anthony Khan
- Caroline Sterling
- Alison Jones

Use Cases

1. Data Flattening

- Bringing data from multiple records into one place
- Quicker and easier reporting

2. Trend Analysis

- Analysing how data changes over time

1. Data Flattening

- Data held in multiple places is brought into one place, making it easier to report on.
- You want to see data in a single report that normally can only be done in multiple reports due to the different criteria or record types.
- Might include sums or counts so that some of the report functions are made easier.
- Results in data that's easier for non-reporting users to understand.

Example – Marketing Campaign Performance

- You want to understand more about how your Marketing Campaigns are performing, for each Campaign you want to see:
 - The number of Web Page Views
 - The number of Open Opportunities generated by the Campaign
 - The value of Opportunities at each Sales Stage
 - The value of Paid Invoices
 - Etc

Example – Marketing Campaign Performance

- You want to understand more about how your Marketing Campaigns are performing, for each Campaign you want to see:
 - **The Target Revenue**
 - **The number of Web Page Views**
 - **The value of Open Opportunities generated by the Campaign**
 - The value of Opportunities at each Sales Stage
 - The value of Paid Invoices

Snapshot Report on Marketing Campaign Performance

Campaign ID	Target Revenue
37	£85,000.00
49	£100,000.00

Campaign ID	# Web Page Views
37	9
49	0

Campaign ID	Total Opp Amount
37	£203,094.99
49	£126,615.00

Snapshot Report on Campaign Performance

Campaign ID	Target Revenue	# of Web Page Views	Total Opp Amount
37	£85,000.00	9	£203,094.99
49	£100,000.00	0	£126,615.00

2. Trend Analysis

- Taking a ‘snapshot’ of a report every day/week/month means you have a record of the data and how it has changed over time.
- Examples:
 - Pipeline – compare your current pipeline to this time last year or this time last month
 - Open Cases – how many cases have they had open at any one time?
 - Contract ARR – see how your ARR has changed over time – what is your expansion and churn?

Sales Pipeline Opportunity Stages

Sales Stage Name	Funnel Position
(0) Unqualified	Top of Funnel
(1) Qualified	Middle of Funnel
(2) Engaged	Middle of Funnel
(3) Preferred	Bottom of Funnel
(4) Won	Won from Funnel (no longer in funnel)
(5) Qualified Out	Qualified Out from Funnel (no longer in funnel)
(6) Lost	Lost from Funnel (no longer in funnel)

What next?

1. Speak with our Professional Services team in the coffee break to talk about your specifics.

(Especially Jean, Rob Hull or Chris Nelson!)

2. Take advantage of our **special offer** for event attendees:

25% off PS days until the end of 2024
